

## Working for Certeco

Certeco plan, analyse, manage, test and deliver major business change programmes for large enterprise organizations throughout the UK.

We are looking for people who reflect our values. That means people like us, who:

- Are passionate about helping our clients
- Work smart and hard
- Love being part of a team
- Are open, honest, practical and straightforward
- Make work enjoyable

It goes without saying that you will need to have excellent interpersonal skills and be professional in everything you do. Our clients are located throughout the UK, so you will also have to be prepared to work away from home if necessary. However, we try to minimise this with the aim that most of our consultants work within easy daily travelling distance of home.

If you join us, you will become part of one of the fastest-growing and most dynamic consultancies in the UK. As well as having the chance to work on exciting projects with top-name clients, you'll be given the opportunity to develop as a professional and as a person, with the support of our first class, in-house development programme.

So, whether you're an experienced consultant looking for a new challenge or someone with a background in Programme Management, Programme/Project Office (PMO) or Testing, who is ready to move into the consultancy arena, we'd love to hear from you.

## The Consultant Role

As a Certeco Consultant you will find yourself working on major IT and business change projects for our clients, many of whom are household names in Banking, Financial Services and Insurance. Our Consultants get the opportunity to carry out a variety of roles and develop their skills and careers in the process. We have vacancies for Consultants, Senior Consultants and Principal Consultants and whichever level you join us at, you will be treated as a valued member of our team.

### Consultants

Our Consultant roles typically cover positions for Test Analysts, Senior Test Analysts and junior PMO positions. For people with excellent business-knowledge but less technical experience who are interested in Testing, there are also openings for Testers.

### Senior Consultants

For more experienced professionals, especially those used to leading and managing teams, we have vacancies for Senior Consultants to carry out roles as Project Managers, PMO Managers, Test Team Leaders and Test Managers as well as specialist roles for Planners and Test Engineers.

### Principal Consultants

Our Principal Consultants often operate at the highest levels within our clients' organisations. This can include roles as a Programme or Project Manager, Test Manager on major projects, Test Programme Manager and Test Process Consultant. A key attribute is the ability to manage not just the delivery aspects of the role, but Certeco's relationship with the client.
